iRubber/Staticworx Endorsement from Mr Adam Waterhouse- ADCO CONSTRUCTION, Victoria Australia

To whom it may concern

In late 2013, ADCO was appointed as the winning contractor to construct and complete new premises on behalf of Olympus Electronics/Digital Imagery at Notting Hill Victoria.

IA Group (Melbourne) had selected Staticworx as the best material for the ESD flooring requirements and as distributors for Staticworx, Murray Gardner from iRubber was contacted to coordinate the sale and delivery of over 630m2 of Staticworx and also Roppe coving materials.

Tight delivery times were needed as well as extra materials to be ordered.

Rubber coving had to be supplied from Roppe on the eastern seaboard USA to ship separately with Staticworx from the west coast USA.

The goods arrived within a day of each other, on time and within budget.

As one of Victoria's leading Tier 2 Building companies, ADCO Constructions has no hesitation in highly recommending Murray and iRubber for the provision of their Staticworx and related materials and services.

Our client, Olympus, is pleased with the result.

In future projects wherein small or large anti-static ESD flooring supply is needed, I can recommend and endorse iRubber Pty Ltd /Staticworx as a preferred supplier to our industry.

Yours sincerely

Adam Waterhouse
Project Manager
